

Transportation Security Administration

Manhattan

MAINTENANCE COMPANY

March 1, 2011

It is with great pleasure that MMC welcomes the Transportation Security Administration ("TSA") to its list of government agency clients. MMC was awarded a contract to provide 24/7 maintenance and emergency response services to all TSA and U.S. Customs areas within the Philadelphia International Airport. MMC's contract has a five year term.

The TSA is part of the Department of Homeland Security and has over 400 employees at the Philadelphia International Airport. The airport consistently ranks in the top 20 busiest airports in the world and began a 13 year \$5.2 Billion renovation project in 2010. The renovation will add two passenger terminals to the existing six, and provide opportunities for MMC to expand its scope of work with the evolving needs of the airport.

MMC won the competitive bid for the contract because of its commitment to provide qualified on-site project management personnel, its experience with 24/7 & TOP SECRET facilities and a rigorous mandatory training program that includes terrorism awareness. All on-site employees are required to go through Department of Homeland Security and U.S. Customs background checks because our scope of work includes areas of the airport that have restricted access.
